WNU 2024 Program Highlights

Explore some of the plenary sessions and teaching courses that will take place during the event.

Plenary Lecture on Stroke

Dive into the critical updates on stroke diagnosis, treatment, and patient care. Our leading experts will cover:

- Understanding the pathophysiology and impact of stroke.
- Latest diagnostic tools and techniques.
- Current and emerging therapeutic approaches.
- Comprehensive patient care management.
- Future advancements in stroke research.

Don't miss the interactive Q&A session to engage with the experts!

Date: Thu, 26.09.2024

Session Time: 09:00 – 10:00

Advances in Multiple Sclerosis (MS)

Explore the evolving landscape of MS with insights on:

- Changing epidemiology and immunopathogenesis.
- Diagnostic criteria and avoiding misdiagnosis.
- Latest in disease-modifying therapies.
- Management strategies for special populations.

Stay updated on the newest guidelines and therapeutic options!

Date: Thu, 26.09.2024

Session Time: 11:00 – 12:00

In-Depth Neuroepidemiology and Clinical Trials

Ideal for both newcomers and seasoned professionals:

- Fundamentals of neuroepidemiology.
- Analytical methods in cohort and case-control studies.
- Design and importance of randomized controlled trials.

Blend of theoretical knowledge and practical examples to deepen your understanding.

Date: Thu, 26.09.2024

Session Time: 15:00 – 16:30

Comprehensive Dementia Update

Stay ahead with the latest in dementia research and treatment:

- Clinical phenotypes and biomarkers for Alzheimer's and other dementias.
- Disease-modifying treatments and multidisciplinary interventions.
- Prevention strategies and global policy efforts.

Equip yourself with knowledge to enhance the quality of life for patients and their families.

Date: Fri, 27.09.2024

Session Time: 11:00 – 12:00

Autonomic Nervous System Disorders

Evaluate and manage common autonomic dysfunctions with expert guidance on:

- Assessment of transient loss of consciousness.
- Management of sudomotor dysfunction.
- Clinical hints for small fiber neuropathy.

Enhance your diagnostic and therapeutic skills.

Date: Fri, 27.09.2024

Session Time: 15:00 – 16:30
